

**Subject:** FW: Satchell Lane inquiry - app ref. F/20/89488

Good morning Rebecca,

Thank you for contacting us for clarification.

Hampshire County Council, as the Minerals and Waste Planning Authority, do not seek to specify the required mitigation measures though we would expect that these be either in the design, landscaping, material use and/or screening choices of the proposed development. The mitigation measures will need to consider the nature of the operation, which will be a mineral extraction and likely to have noise and traffic impacts, with potentially dust issues. The mineral extraction at Hamble Airfield will be a temporary development of around 12 years, though the exact timeline will depend on the start date and extraction rate, we would strongly encourage discussion with the extraction operator (CEMEX) as they will be best placed to provide advice on the potential mitigation needed. The planning application for Hamble Airfield can be found here: <https://planning.hants.gov.uk/Planning/Display/HCC/2021/0787>

Due to the temporary nature of the mineral development, we would not usually consider a need to alter the distances of the houses. We would expect that mitigation could be achieved through the phasing of the development, as well as appropriate landscaping and design.

If you have any further questions, please don't hesitate to contact us.

Kind regards

**Andy Denton** *BSc. (Hons) MSc. MEnvSc*
